

SURAJ RAUNIYAR

Email: rauniyarsuraj667@gmail.com | GitHub: SurajRauniyar1

SUMMARY

Backend-focused Software Engineer pursuing M.Tech CSE at NIT Meghalaya with strong foundations in Data Structures, OOP, DBMS and Operating Systems. Experienced in developing scalable backend services, AI-powered applications and full-stack solutions using C++, Python and JavaScript.

EDUCATION

M.Tech CSE - National Institute of Technology Meghalaya (2025-2027) | CGPA: 8.33

B.Tech CSE Big Data Analytics - SRM University (2020-2024) | CGPA: 8.6

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, C

Backend: Node.js, Express.js, FastAPI, REST APIs, Microservices

AI/ML: LLM APIs, NLP, TensorFlow, CNN, Prompt Engineering

Database: MongoDB, PostgreSQL, Redis

Tools: Docker, AWS, Git, GitHub, Linux, Postman

Core: DSA, OOP, DBMS, OS, Computer Networks

EXPERIENCE

Web Development Intern - Ransh Innovations

- Developed reusable React components improving frontend maintainability.
- Built and tested REST APIs using Node.js, Express.js and Postman.
- Used Git/GitHub workflows for version control and collaboration.

Government IT Service - Bagmati Municipality Nepal

- Managed digital records, reporting workflows and IT-enabled administrative systems.
- Maintained confidential data following government security protocols.

PROJECTS

AI Developer Assistant Platform | Python, FastAPI, LLM APIs, PostgreSQL, Docker

- Built AI-powered backend system integrating Large Language Models for intelligent query processing.
- Designed scalable REST APIs with authentication and database persistence.
- Implemented embedding-based retrieval pipeline for context-aware AI responses.
- Containerized backend services using Docker for deployment-ready architecture.

AI News Intelligence System | MERN, NLP, Redis

- Developed real-time news aggregation platform integrating multiple external APIs.
- Added AI-based summarization and personalized content filtering features.
- Optimized backend performance using caching and efficient API design.

Diabetic Retinopathy Detection | Python, TensorFlow, CNN

- Built CNN model for retinal medical image classification.
- Applied preprocessing and training pipeline to improve prediction performance.

ACHIEVEMENTS

- ICCR Full Scholarship - M.Tech at NIT Meghalaya
- COMPEX Full Scholarship - SRM University
- Student Ambassador - SRM University
